

SMS COMPLIANCE SUPPORT

Tailored solutions to achieve SMS compliance.

The implementation of a Safety Management System (SMS) is an international standard for business aircraft operators. ACASS, as an IS-BAO registered Canadian aviation organization, is at the forefront of SMS compliance support and implementation.

SMS **\$300M**
COMPLIANT SINCE 2008 INSURANCE COVERAGE

“ACASS listens carefully to our needs and responds very quickly with customized, cost-effective solutions. You would be hard pressed to find any other organization that can match their flexibility and versatility, with such a high commitment to superior service. I would recommend any of ACASS’s services to any business jet owner or operator.”

✈ JOSÉ EFROMOVICH, MEMBER OF THE BOARD FOR SYNERGY GROUP

WHY CHOOSE ACASS?

The implementation of a Safety Management System (**SMS**) is an international standard for business aircraft operators. Through a business-oriented approach, it is an explicit, comprehensive and proactive process for managing safety risks. SMS compliance can be achieved by registering to the International Standard for Business Aircraft Operators (**IS-BAO**), a highly recognized code of best practices fostering a high level of safety and professionalism.

Option 1 - File for IS-BAO registration

ACASS can assist business aircraft owners and operators to achieve their SMS objectives by guiding them through a structured 5-step process to file and prepare for the IS-BAO audit.

Our gap analysis, with IS-BAO standards as the benchmark, will identify the solutions to implement, including a comprehensive SMS. We support you through the entire process to ensure all criteria to successfully obtain the registration are met.

Option 2 - Fly under ACASS operation

ACASS offers turnkey Flight Operations support services to aircraft owners and operators, which ensures IS-BAO and SMS compliance without the requirement to file for their own independent registration. This transitional service is designed to help an organization comply with SMS standards while minimizing disruption and cost.

Increased return on investment

The implementation of an SMS results in increased efficiency and a more safety conscious environment for your organization. This directly impacts the processes governing the management and operation of your aircraft, making them more streamlined and more efficient.

Proudly Canadian

Canadian company founded in 1994, based in Montreal with regional offices in the UK (London), UAE (Dubai) and USA (Dallas).

Unparalleled international expertise

Extensive real-world experience and vital working knowledge in the following regions: India, Middle East, Russia, Africa, China, South-East Asia, North and South America.
